

Media Graphics

Environmental Policy

Media Graphics is a display graphics company based in Greenwich, Southeast London. We are aware of the impacts our industry has on the environment through paper, ink and chemical use and are committed to mitigate these impacts using the following practices.

- Comply with all applicable environmental legislation currently ongoing.
- Reduce, reuse and recycle solid waste where economically and environmentally sensible.
- Dispose of all waste using only licensed waste contractors.
- Improve our energy efficiency by regularly monitoring our energy use and implementing a switch off campaign. Reduce carbon footprint within twelve months by one tonne per £1,000,000 revenue.
- Ensure all business operations are conducted with due regard to the environment, its habitats and biodiversity. This to specifically include the avoidance of littering or noise pollution outside the premises
- All equipment-purchasing decisions will have waster minimisation, energy efficiency and pollution reduction, amongst the key criteria.
- Operate an approved supplier system that favours products derived from recycled materials or renewable resources.
- Raise staff awareness of environmental good practice through their induction process, signage on the premises and regular electronic updates. Ensure that all staff are fully conversant with alternative materials within three months of recruitment. Provide an annual staff briefing on performance against environmental targets set.
- Apply supply chain awareness with all existing and proposed suppliers, and encourage clients to use products and services that are environmentally responsible.
- Reduce our requirements for transport by combining deliveries and where possible utilising electronic alternatives.
- Protect the health and well being of all staff and visitors to Media's premises through adequate health and safety procedures.
- Avoid use of hazardous or non-degradable chemicals. Where the use of such substances is unavoidable, train staff in their handling and disposal and take precautions to minimise the impact of spillage.
- Operate our business in a responsible manner with due regard to the business premises immediate environment, particularly at unsociable hours in relation to noise, odour, materials, lighting, litter, uncollected waste or deliveries and collections.
- The action plan arising from this environment policy will be communicated to all stakeholders through our website and to staff specifically through being displayed in company premises.

Media Graphics is committed to improving their environmental performance and will review this policy and our performance against targets set on an annual basis.
